Short Description: Elitech GSP-6G Digital Temperature and Humidity Data Logger measures and records temperature and humidity levels. This Data Logger has a large screen that shows real-time readings and an alarm that sounds if the temperature or humidity goes beyond the set range.

Long Description: Elitech GSP-6G Digital Temperature and Humidity Data Logger can store up to 16,000 data points and can be set to take readings every 10 seconds to 24 hours and you can download the recorded data to a computer using a USB cable and analyze it with the provided software. This Digital Temperature and Humidity Data Logger is helpful for anyone needing to track temperature and humidity over time for business or scientific use.

Features Of Elitech Digital Temperature and Humidity Data Logger:

- This data logger records both temperature and humidity. It measures temperatures from -22°F to 158°F with ±0.9°F accuracy, and humidity from 0% to 100% with ±3% accuracy.
- This device has a large screen that shows current temperature and humidity, along with the highest and lowest values recorded.
- This data logger has an alarm that activates if temperature or humidity goes beyond the set limits.
- This device can store up to 16,000 temperature and humidity readings.
- This device can be set to take readings every 10 seconds to 24 hours.
- The software lets users analyze and graph the recorded data.
